

INTERNSHIP PRESENTATION

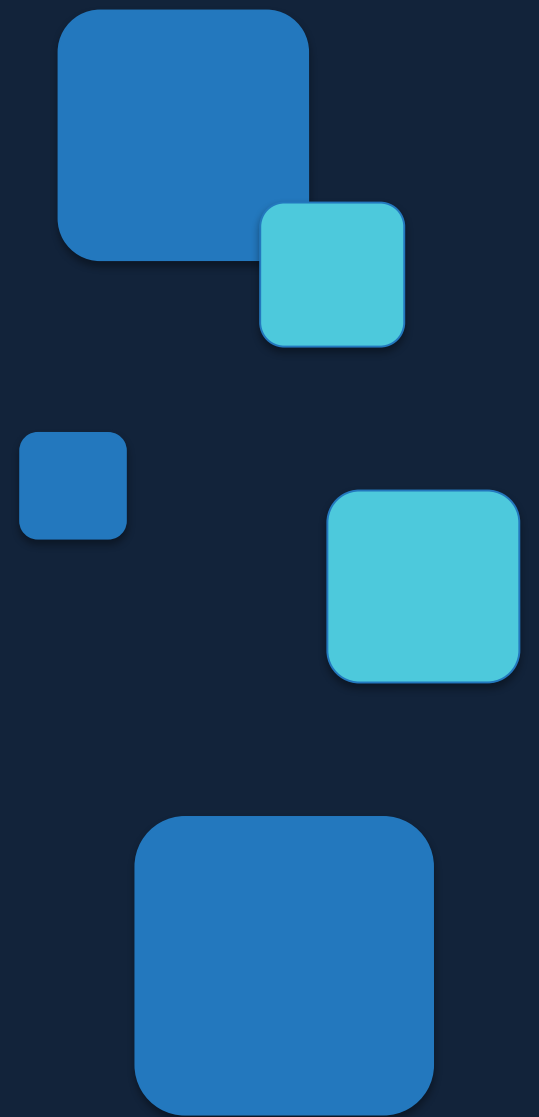

AWS Data Engineering Virtual Internship

AWS Academy Curriculum • AICTE – EduSkills National Internship Portal

DISHA KUMARI

B.Tech CSE (Core) | 5th Semester
Section 3CSE24 | Enrollment No. 2410031276
Session 2024-2028

APRIL 2026 — JUNE 2026

Internship at a Glance

A concise view of the program, scope and learning model

DOMAIN

AWS Data Engineering

DURATION

April 2026 – June 2026

PROGRAM

AICTE – EduSkills Virtual
Internship

LEARNING MODEL

Weekly learning •
assessments • practical
exposure

Program reference

C16Y2026M051421160

Student ID

STU6831912c2a6bb1748078892

Core focus

? Data engineering workflows and pipeline design

- AWS storage, query, ETL and streaming
- Big-data processing, analytics and ML data preparation
- Security, scalability, automation and CI/CD

Internship Objectives

What the internship was designed to build

01

Understand the role of a data engineer

02

Design and reason about data pipelines

03

Learn AWS storage, query, ETL and streaming services

04

Understand data quality, security and scalability

05

Explore big-data processing and ML data preparation

06

Learn analytics, visualization and automation

07

Build readiness for AWS certification-oriented learning

8-Week Learning Journey

Progression from fundamentals to certification-oriented readiness

W1

**Data Engineering for
Data-Driven
Organizations**

W2

**Data Elements &
Pipeline Design
Principles**

W3

**Securing, Scaling &
Ingesting Data
Pipelines**

W4

**Efficient Data
Management & Big
Data**

W5

**Big Data & Preparing
Data for ML**

W6

**Analyzing & Visualizing
Data**

W7

**Automating the
Pipeline**

W8

**Bridging to
Certification**

AWS Technologies & Tools

Service map used to understand the modern data engineering stack

Storage & Warehousing

Amazon S3
Amazon Redshift

Query & ETL

Amazon Athena
AWS Glue

Streaming

Amazon Kinesis
Kinesis Data Firehose

Big Data

Hadoop / Spark / EMR

Analytics

Amazon QuickSight
AWS IoT Analytics

ML & Orchestration

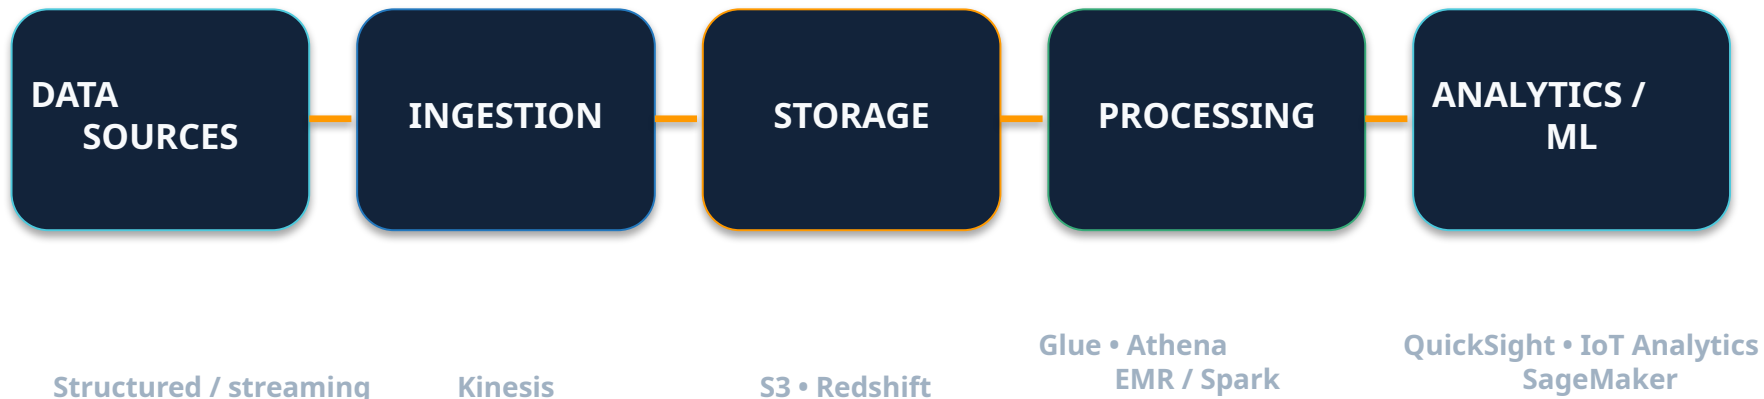

SageMaker / Canvas
AWS Step Functions

Engineering Practice

ETL / ELT
CI/CD

Conceptual Data Engineering Architecture

From raw data sources to analytics and machine learning

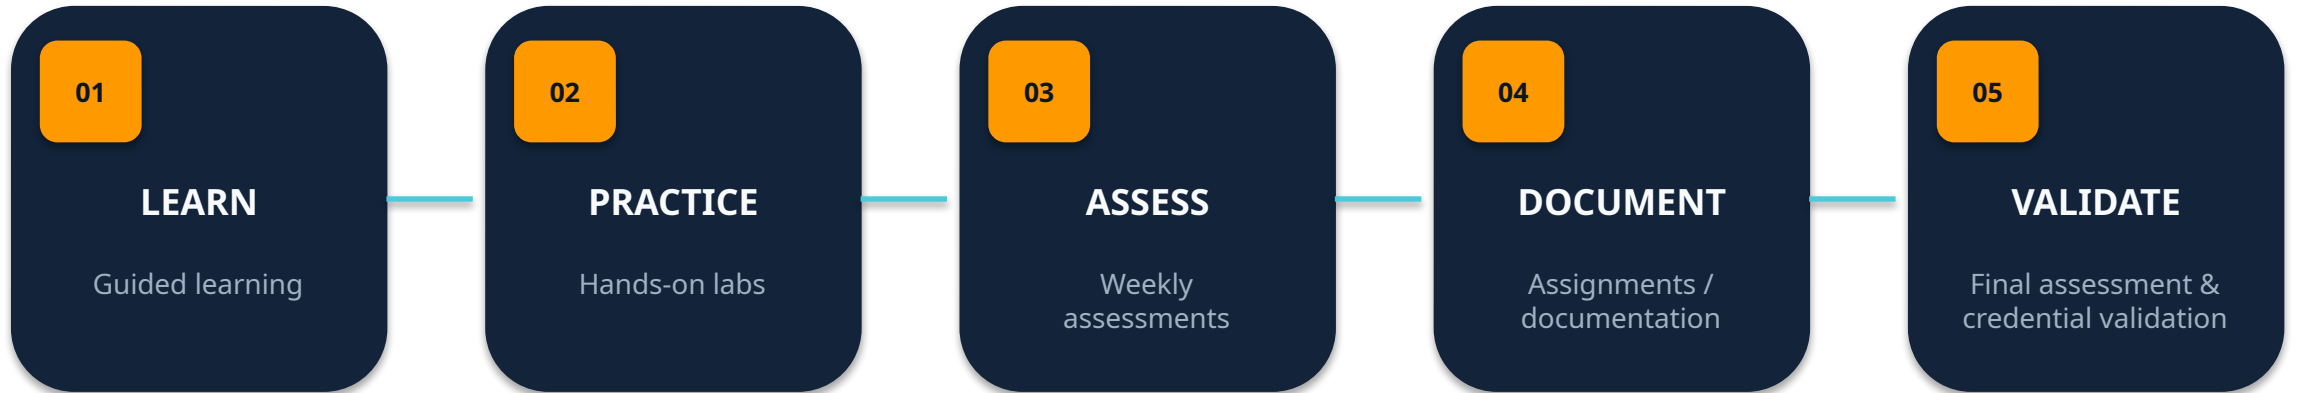

Cross-cutting controls

- Security
- Data Quality
- Scalability
- Automation
- CI/CD

Learning Methodology

A repeatable cycle combining guided learning with practical validation

The methodology moves from knowledge acquisition → application → evidence → validation.

Expected Learning Outcomes

Capabilities and awareness developed through the program

02

Familiarity with AWS data services

03

Data quality, security & scalability

04

Exposure to big-data technologies

05

ML data preparation awareness

06

Analytics & visualization exposure

07

Automation, orchestration & CI/CD concepts

08

Further AWS certification readiness

Professional Takeaways

How the learning journey connects to real-world data engineering work

PIPELINE THINKING

Break a data problem into source, ingestion, storage, processing and consumption layers.

RELIABILITY & GOVERNANCE

Keep security, data quality, scalability, automation and CI/CD in the design conversation.

ANALYTICS → ML

Understand the path from prepared data to visualization and machine-learning workflows.

CERTIFICATION READINESS

The internship provides a structured bridge toward continued AWS learning and certification-oriented preparation.

Credential Highlights

Two data engineering credentials included in this portfolio

AWS ACADEMY · DATA ENGINEERING

Training Badge

40 hours completed

Issued: 06/02/2026

Digital badge ? Credly

Evidence included in this presentation

AICTE · EDUSKILLS · DATA ENGINEERING

Virtual Internship Certificate

8-week internship

April · June 2026

Curriculum provided by AWS Academy

Certificate ID / Student ID shown on original

Certificate 1 · AWS Academy Data Engineering

AWS Academy Graduate · Data Engineering · 40 hours · Issued 06/02/2026

Certificate 2 — AICTE-EduSkills Virtual Internship

Data Engineering Virtual Internship • April-June 2026

THANK YOU
